HIX CEILING MOUNTED 300MM OVERHEAD SHOWER

Install Image

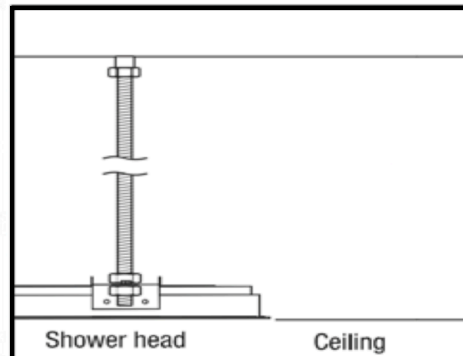

1. Use the shower frame as a cutting template to mark out, then drill hole in ceiling

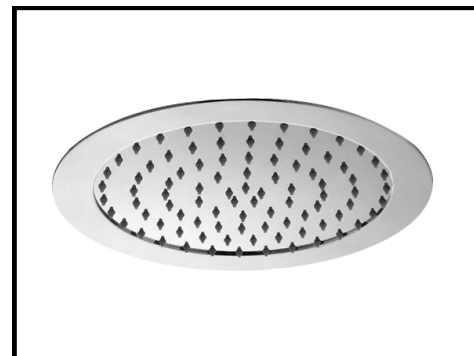

2. Install the bracket on the ceiling floor with screws

3. After the bracket is fixed then put the 400mm shower inside it.

4. Connect the shower hose to the water supply and test if it is leaked.

5. Installation is finished and enjoy your shower.
